### ← *Night Blinds in use*

*The specially designed Aspis Night Blinds keep the heat out and the cold in during non-operational hours.*

**Aspis features:**

*Aspis Night Blinds come with strong magnets that allow for installation to the case without screws. Magnets attach to the bottom of the case as well when the blinds are extended.*

**Aspis Magnet:**

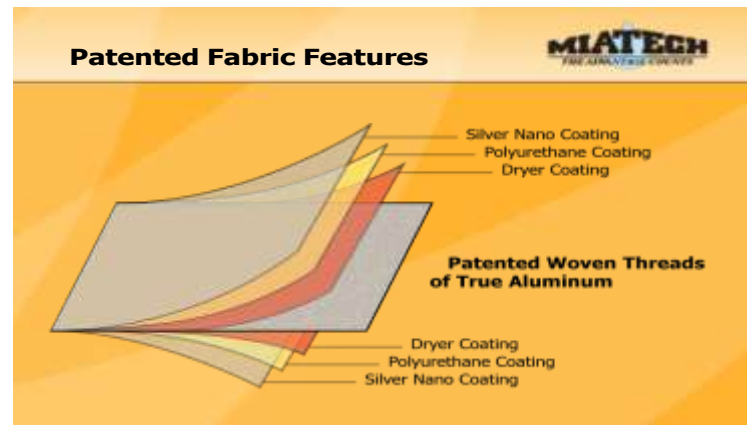

*Aspis Night Blinds include a new style of **speed reducer** that prevents rapid roll up.*

**New style speed reducers:**

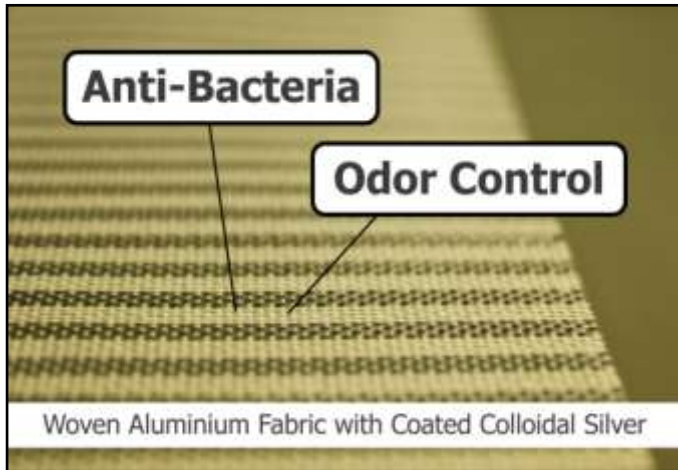

*Many night blinds rolling up without speed reducers can snap back, damaging or destroying the blind*

*Aspis blinds use a **patented unique woven aluminum fabric**. This fabric resists damage better than anything on the market today and increases the thermal protection benefits.*

***Technical Patented Features***

*The fabric of the Aspis night blinds have an Anti-bacterial coating that resists bacteria and mold that can build up on the back of ordinary night blinds, requiring cleaning or shortening its useful life.*

***Miatech Night Blinds***

***TURN WASTE INTO PROFIT!***
